Acube Infotech solution platform applies innovative data science to transform item-level data into valuable operational intelligence, helping organizations manage the entire life-cycle of their unique identities from source to sale to the consumer.

About Us

Acube Infotech is a leading provider of business solutions in the field of UHF, RFID in the GCC and beyond. Our core services include the development, implementation and maintenance of customized solutions that follows advanced RFID technology.

We believe the only way to do great work is, to love what you do. Acube is promoted by experienced techno entrepreneurs. The promoters have invested a decade in providing RFID and system-integrated solutions, therefore building goodwill and commercializing state-of-the-art technology for various reputed organizations in the GCC and beyond.

Acube RFID application has a proven track record of improving business processes where identification, authentication and automation are of prime concern. Acube has partnerships with global manufacturers for RFID tags and hardware. We use our expertise to provide quality services to all our clients.

Acube has a global presence with its head office in Dubai, UAE. Our clientele ranges from large multi-national companies to small local businesses. We deliver quality business solutions supported by dedicated teams of professionals who are experts in the industry they operate in. We lead all work projects through our experienced Project Managers and Senior Business Analysts who follow a structured methodology to ensure your needs are incorporated with cost control at all times.

What is RAIN RFID?

RAIN RFID is a passive, battery-free wireless technology system that connects billions of everyday items to the Internet. These connections provide rich, real-time data and insight, enabling businesses and consumers to identify, locate, authenticate and engage with each item.

Our Vision

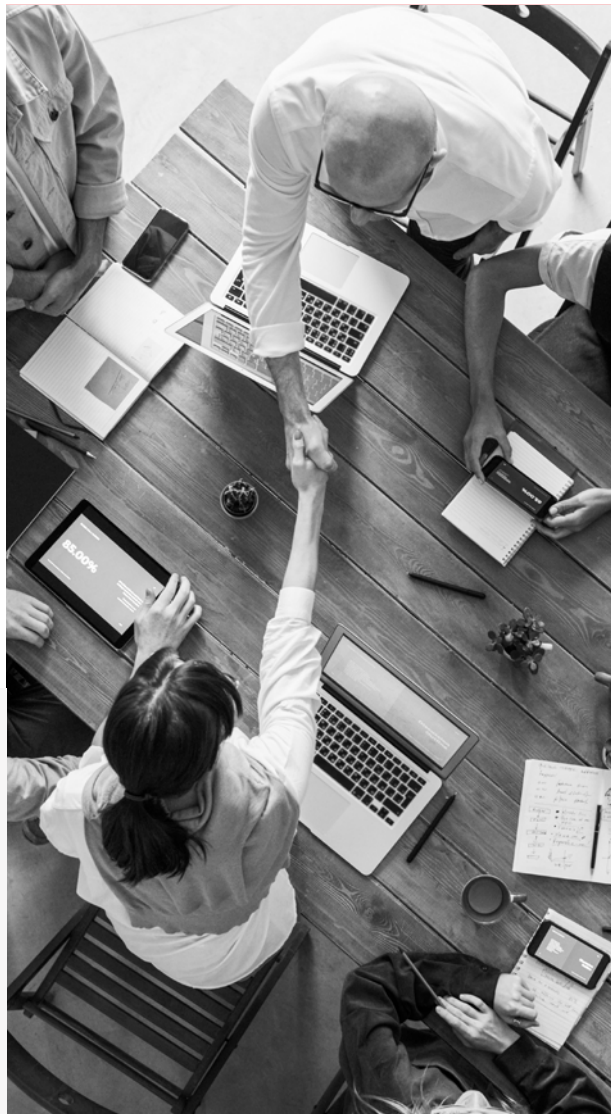

To sustain our position as the first and the best RFID solution provider in GCC and beyond. To build a long-term relationships with our clients and business partners by pursuing business through innovation and advanced technology.

Our mission

Expanding our business and the quality of service is our ultimate goal. Our professional team will provide an innovative level of smart solutions. Acube is the real innovator, inspired by innovation and empowered by technology.

“ We’re inventing a future in which not just electronic devices are connected, but every item in our everyday world is connected. Expanding the Internet’s reach by a factor of 1,000 to retail apparel, packages, letters, automotive parts, airline baggage, pallets, medical supplies, food and much, much, more.

- *Chris Diorio, Founder & CEO, Impinj, Inc.*

Our Value

-  The objectives and functions of our procedures are **customer oriented**.
-  We are a **team of highly skilled professionals** who are committed to the long term success of your company.
-  We **innovate** to improve our client’s business outcomes and enhance their assets control and management.

-  **Integrity is our cornerstone**; consistency in everything we do is what we live by.
-  We are **honest with our customers**. We give them an honest assessment of our products and their capability.
-  Our company motto: **Excellence** in all we do reflects our core values.

Our Solutions

Track Your VALUABLE INVENTORY Using Acube RFID

Acube Infotech is a leading provider of business solutions both within the private and public sector in the field of UHF RFID, providing end-to-end solutions from product design to installation. Our primary focus is on simplifying everyday processes while improving service delivery. We offer innovative solutions that give you the most complete experience acquired over a decade. Our core capabilities include centralized deployment and infrastructure, complete solution design and development, turnkey system integration and customer support

RFID ASSET MANAGEMENT SYSTEM

Acube asset management system takes care of your assets in 360 degrees. The integrated system has a centralized platform, hardware, and accessories to form total asset control and monitoring management. With this solution, your assets in the company will be kept in appropriate condition and maintain their worth. The system maximizes the reliability and stability of assets, predicts equipment failure and moves your preventative maintenance to the next level. It also overcomes the risks of theft, inaccurate records, outdated reports, auditing issues, loss in tracking assets in transfer and human error.

Acube RFID's systems help clients to take control of their assets, save time and money, improve safety and achieve better value – and have a rapid payback period.

RFID RETAIL FASHION

Acube inventory management system is adaptable to any industry and can automate complete supply chain operations. Knowing the exact location of every item is the basis for efficient store management and omnichannel retailing. Moreover, real-time analysis based on item-level data or reduced store labour costs are the other significant benefits of RFID retail fashion implementation. Since RFID-based solutions are highly scalable, far more accessible to implement than ever and increasingly seen as a safe investment, the use of RFID in fashion retail is proliferating.

RFID WAREHOUSE INVENTORY MANAGEMENT

Acube warehouse management system automates the entire process, from order entry and picking to tracking and shipping. It brings tremendous benefits through its reduced cycle time, improved product flow, and increased warehouse safety and security. It eases integration with all the existing enterprise systems, optimises labour costs and has the capability to handle real-time changes in market demand.

Increased operational productivity, improved customer service, employee satisfaction, reduced inventories in the supply chain and increased product security are the key benefits of the automated warehouse management system.

RFID JEWELLERY MANAGEMENT

Acube jewellery management system based on RFID counts your entire inventory in minutes and keeps track of your stock daily. The locate feature helps you quickly find a missing item in your store. Moreover, by automating these courses, the Jeweler can focus on his core business, selling Jewelry. The system is manageable equally on cloud and desktop versions, along with an android mobile app for handheld RFID readers. The application is customizable according to the client's necessities and can be integrated with existing ERP or POS systems. It increases process efficiency, reduces theft and gives you on-the-spot visibility of what is happening inside your store.

RFID has been found to reduce your annual operating costs by around 3% compared to older generation, cash-based payment systems.

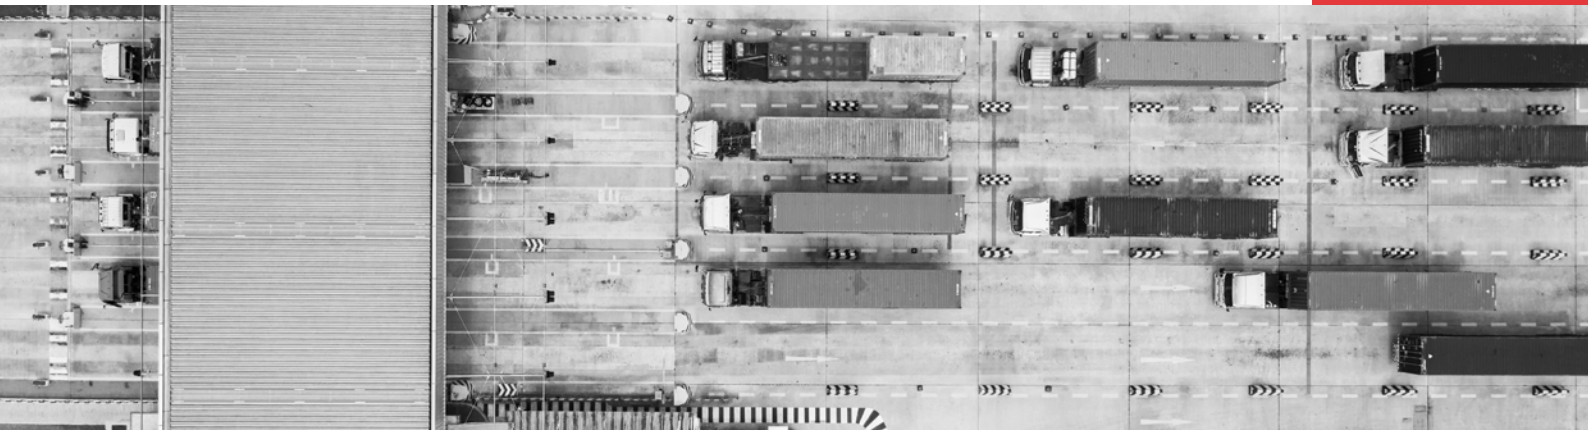

RFID LINEN AND UNIFORM MANAGEMENT SYSTEM

Acube RFID technology has turned linen, uniforms and laundry management into a comprehensive and user-friendly approach, thereby minimizing the administration and workload. A direct result of this work is the rapid and convenient reduction of costs. Using the database of the RFID chips, it can draw quick statistics of the price. The added benefits also include faster identification and an assortment of textiles.

RFID VEHICLE TRACKING SYSTEM

Acube vehicle tracking system is very efficient for in-vehicle monitoring and control, serving highway authorities, free zone authorities, ports, and facilities. All vehicles with RFID tags can be identified by reading the respective tags, even from a distance. The electronic toll collection (ETC) system lets the drivers pass without halting and paying money as in the traditional method. Tollgate solution, open road tolling system, and truck monitoring system based on the RFID platform is offered by Acube on your budget to enhance the business.

RFID EVENT MANAGEMENT SYSTEM

Acube event management system is a turnkey solution for managing your guest lists, printing and distributing accreditation, managing your clients during a live event and reporting on the success of your event. The system automatically captures your guest's arrival time, duration of stay, and departure time. This information is used in several ways and tracked in real time. Hence you no longer need to rely on manually counting guests. Our system analyzes the success of your event, negotiates with caterers and event planners and forecasts future event attendance. Moreover, you can utilize our powerful reporting capabilities to look at your event from every angle and make sound decisions based on the collected data.

RFID LIBRARY MANAGEMENT

Acube library management system is an automated solution for organizing, maintaining and keeping books systematically, even in large volumes. The system is a foolproof integrated, adaptable solution for libraries, making it the most demanding software. Our system provides tractable, instinctive and efficient software for library management designed in line with your operations and environment.

The system helps to maintain a database providing precise and quick information regarding new books and books borrowed by others in no time, eliminating the manual record burden of patrons.

Our Solutions Overview

Acube is a global provider of RFID solutions which helps businesses and people analyze, optimize, and innovate by wirelessly connecting billions of everyday things—such as apparel, assets, automobile parts, luggage, and shipments—to the Internet. The system uses RAIN RFID to deliver timely data about these everyday things to business and consumer applications, enabling an unlimited Internet of Things.
